

Sanitize cutting boards, knives, utensils, counter tops, food prep sinks, and any other food contact surfaces after preparing meat, fish, poultry, or any other food.

Mix approximately 3/4 to 1 teaspoon of bleach to each gallon of lukewarm water and check solution often with a test strip (50-200 ppm).

Change solution every 2-3 hours or sooner if needed.

Keep wiping cloths in solution between uses.

When using QUATS or iodine, mix according to directions on the label.
